

Harshil Raval

Full Stack Web Developer · React · TypeScript · Node.js

harshilraval2015@gmail.com +91 97372 48676 harshilraval.vercel.app

SUMMARY

Full stack web developer with 4+ years of experience building production web applications with React.js, TypeScript, Node.js and MySQL. For the last three years I have built the frontend of a multi-tenant workforce management platform for care agencies, covering scheduling, timesheets, invoicing and reporting. Strong in frontend architecture, reusable components, REST API integration and real-time interfaces.

SKILLS

Frontend	React.js, TypeScript, JavaScript, MobX, Redux, Formik, Yup, FullCalendar, Drag & Drop, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
Database	MySQL, MongoDB
Real-time & AI	Ably, Socket.io, Cursor AI, GitHub Copilot, ChatGPT API
DevOps & Tools	Git, GitHub, Webpack, Babel, npm, CI/CD, Vercel

PROFESSIONAL EXPERIENCE

Benagon Technologies · Software Developer Nov 2023 – Present

20x – Nursing & Care Agency

Multi-tenant workforce platform for nursing and care agencies, built with React, TypeScript and MobX.

- Developed a web app for staff scheduling, time tracking and payroll, reducing schedule conflicts by 30%.
- Built the **Scheduler and Timesheet calendars** with drag-and-drop shift booking, staff availability, shift types, day/night and split/sleepover rates, shift buffers and conflict warnings.
- Delivered **client invoicing** features: manual invoice lines, credit notes, partial payments and invoice recalculation, plus bulk pay-band and rate updates and a copy-client-settings tool with history.
- Built **report screens** with filters and Excel/PDF downloads (staff data, staff payments, compliance, DBS, shift booking).
- Implemented the **real-time staff-admin chat** interface and live progress updates with Ably.
- Refactored React code into reusable hooks, decreasing duplication by 40%, and managed state with MobX.
- Contributed 2,000+ commits to the React codebase, resolving ticketed bugs and feature requests across the Scheduler, client manager, staff manager, settings, recruitment and reporting modules.

20x – Dom Care

A digital timesheet solution for home care providers.

- Developed a digital timesheet calendar for home care providers, displaying shifts in an easy-to-read 24-hour view.
- Built the visit scheduler with drag-and-drop visit planning and Google Maps staff location.

Balkrushna Technologies · Full Stack Developer Feb 2022 – Nov 2023

Chatbot Widget System

A real-time messaging and support widget for web platforms.

- Built a real-time chat system using Socket.io and developed backend APIs with Node.js and MySQL.
- Designed a simple, step-by-step setup for integrating chat into websites.

RBAC System (Role-Based Access Control)

A secure CRM with user and role-based permission management.

- Developed a secure CRM with React, Node.js, and MySQL, implementing JWT for role-based access control.
- Streamlined user and role management, enhancing security and user experience through dynamic interface updates.

Blockchain System

A visualization tool for blockchain member structures.

- Developed a dynamic tree view for blockchain member hierarchies, with auto-updating data.

EDUCATION

Bachelor of Information Technology · Sigma Institute of Engineering	2019 – 2022 · CGPA 8.17
Diploma in Information Technology · Government Polytechnic Gandhinagar	2016 – 2019 · CGPA 7.76
